## **DETAILED ACTION**

### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority. It is noted, however, that applicant has not provided English translations of the German applications as required by 35 U.S.C. 119(b). Thus, the priority date of the instant invention is January 14, 2004 (the date of the PCT application). Without the English translations, one cannot ascertain if the instant invention is present in the German applications.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-3 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-3 provide for the use of cinnarizine and dimenhydrinate or their physiologically compatible salts in combination for the treatment of vertigo of any genesis, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 4173

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by the work of Halama.

Specifically, Halama teaches an Arlevert composition (i.e. combination of cinnazirine and dimenhydrinate) in the treatment of peripheral-vestibular and cerebral vertigo and the concomitant symptoms (see English abstract vs. instant claim 1). In particular, Halama teaches a control therapy where a tablet formulation of Arlevert was given and vertigo endpoints were evaluated using a cranial topography method ( see page 1424, column 3 and table 3 vs. instant claim 2). It is further noted that the tablet Arlevert further composed of adjuvants and/or additives such as magnesium stearate. hypromellose, cellulose, etc...(German copy and see <http://www.gelbe-liste.de>). Accordingly, the teachings of Halama anticipate claims 1-3.
